Crystal Data Science Workshop

Crystal System in partnership with **University POLITEHNICA of Bucharest** have the pleasure to invite you to **Data Science Workshop - Interpretation and extraction of insights from a data analysis report**.

We have already **trained hundreds** of students through professional **courses** in multiple universities all around the world and want once more to share our knowledge in data science with you.

Participants will be involved in a **brainstorm** about the latest challenges of big companies in Data Science. Using use cases our Teacher **Emiliano Mankoli** will guide you in developing new ideas for this field.

The **Workshop** will be **Free**, so we encourage you all to **participate to learn more** about Data Science.

The team who comes up with the best ideas will be awarded substantial prizes.

The Workshop will take place in **University POLITEHNICA of Bucharest**, on **19.05.2022 – 10:00**, **Faculty of Energy Engineering** - For more details, please follow our social media.
